## A guide to manufacturing services

- Design Engineering
- Prototype Development
- Testing and Inspection
- Information Management
- Project Personnel

# Engineers

Continuous improvement in product and process is critical to the success of manufacturers in virtually every industry. That is why companies like yours continually look for better, faster, and more cost-effective ways of producing high-quality products.

For many, the solution is to partner with the DYNAMIC GROUP, a turnkey source for world-class people, technology, and services.

## Your turnkey source for people, technology and services to increase

In the past two decades, we have grown from a handful of individuals to four full-service companies: Dynamic Corporation, Dynamic Design, Inc., Dynamic Information Systems, Inc., and Dynamic Personnel, Inc. Through these four companies we are able to provide your company with the advanced technology and expertise needed to find effective solutions to your most critical manufacturing challenges.

Past successes include working with companies to design and build special machines; automate processes; improve plant layout; customize software; develop and assemble prototypes; provide first article inspection; develop training programs and technical manuals; and manage projects from initial product development through the successful start-up of the manufacturing system.

As important as advanced technology and technical expertise are, we are also ready to contribute something else that's just as important to the success of your team: a spirit of initiative and excellence. We are committed to providing you with world-class manufacturing services that will increase your company's productivity, and ensure your customers' complete satisfaction.

*your company's productivity.*

The DYNAMIC GROUP is  
built on people whose  
integrity,  
experience, and shared  
commitment to  
excellence  
have created a truly  
unique professional service  
organization.

Our goal is to meet,  
and exceed, your  
company's needs.

Lab validation. Precision build. Testing. All are critical to your company in developing and producing top-quality products. All are also services offered by Dynamic Corporation to ensure the quality and integrity of your finished product before production even begins. Services that can be accessed individually to meet specific needs, or “bundled” together for larger, more involved projects.

# Dynamic Corporation

Using state-of-the-art inspection equipment capable of measuring today’s close manufacturing tolerances, our metrology laboratories can certify your gage, fixture, or product for conformance to dimensional specifications. ISO Guide 25 Accreditation and Delco Electronics Corporation Dimensional Measurement Accreditation are independent proof of our commitment to excellence.

- Inspection
- Certification
- Testing & Analysis
- Design & Build
- Prototype Development
- Bundled Services
- Reverse Engineering

**DYNAMIC PROTOTYPE OPERATIONS** coupled with our design, engineering and inspection services allows us to continue offering quality, competitive services to your manufacturing operation. Our capabilities include precision machining and plastic injection molding of new products and the initial tooling required for their production. Closely monitored production and inspection of finished parts provides a complete solution to your new product development.

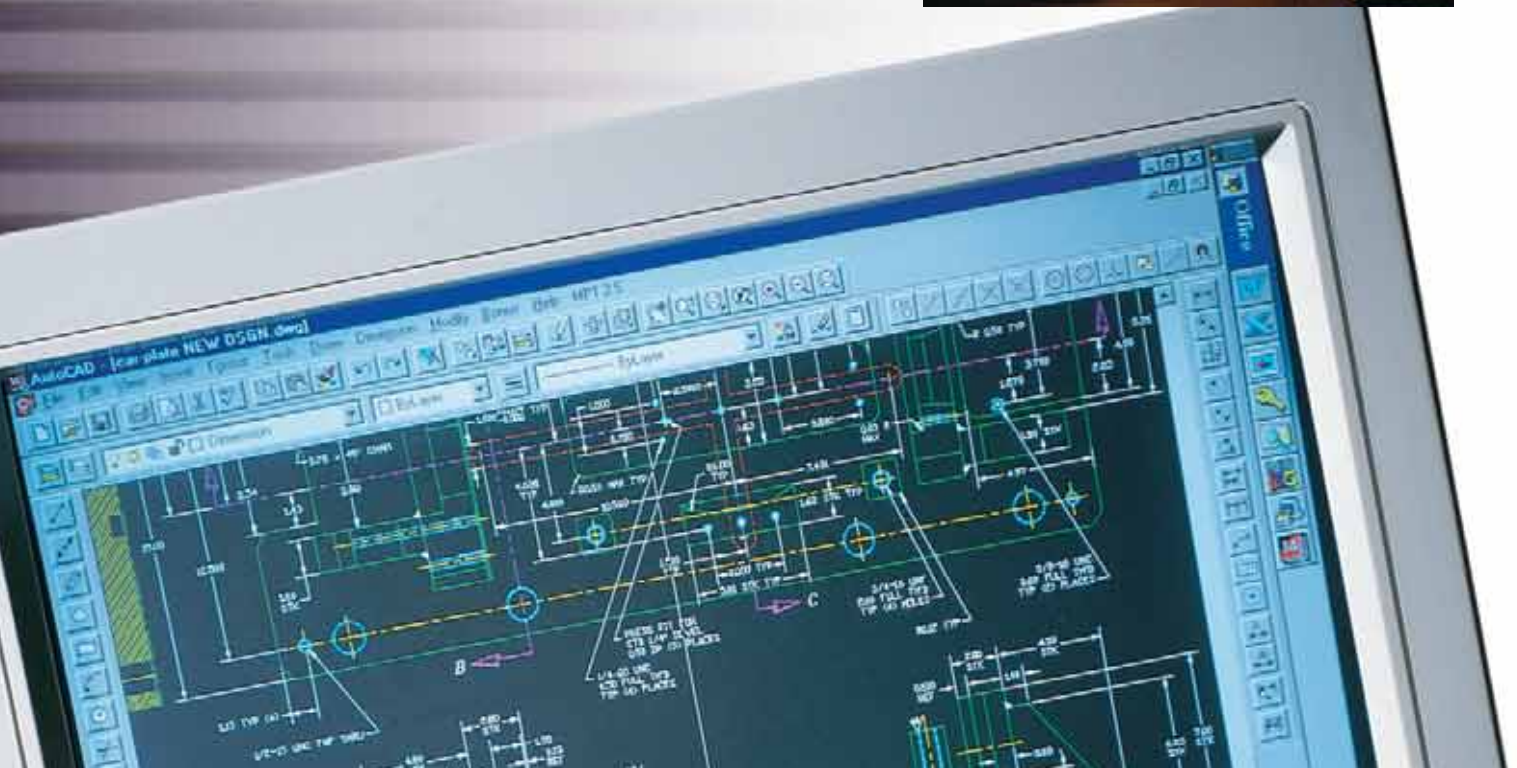

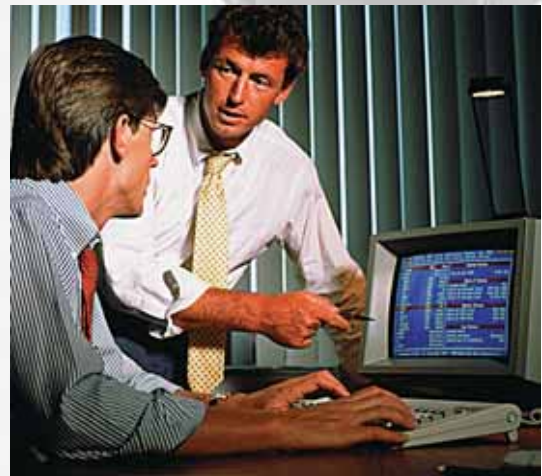

Dynamic Design, Inc. offers a variety of design engineering services that ranges in scope from the engineering of a single component, to the design and development of a new machine or assembly line.

# Dynamic Design

We offer process design services to help you determine the best method of machining and/or assembling a particular part or product. Gage design services that can assist you with the development of digital, indicator, electronic, functional, laser, and optical gages. Fixture design services that can generate precision fixtures for use in manufacturing, assembly, and testing. And specialized tooling design services for the development of specialized cutting tools, cams, and tool layouts.

We can assist you with the development of specialized and automated machines, manufacturing systems, and assembly lines. We'll even help you determine how to set up this equipment in your manufacturing facility for maximum production flexibility and productivity now, and in the years ahead.

- Research & Analysis
- Product Development & Design
- Gage & Fixture Design
- Process & Tool Design
- Contract Engineers
- Special Machine Design
- Automated Equipment
- Technical Project Personnel

You know that collecting, analyzing, and distributing information are critical to the success of any project and any company. If you're like most of us, the amount of information you need to manage is continually increasing in both amount and complexity.

## Dynamic Information Systems

At Dynamic Information Systems, Inc., we're ready to help you develop custom information management solutions to this problem. Using the latest computer hardware and software technology, our staff of experienced systems analysts, computer programmers, project managers, data entry personnel, technical writers, and art directors can design tools and systems that will help you qualify, quantify, organize, and otherwise manage everything from product specifications, to production schedules, to customer presentations.

Our goal is to help you control and use all the critical information available to you in an efficient and cost-effective manner.

- **Project Management**
- **Presentation Graphics**
- **Networking & Internet**
- **Custom Database Applications**
- **PC Installation & Support**
- **Data Collection & Entry**
- **Training**
- **Equipment Leasing**
- **Desktop Publishing**

# Placement Services

Companies like yours looking for permanent and temporary employees have long found Dynamic Personnel, Inc. to be a reliable resource when it comes to filling office, technical, managerial, and other skilled positions critical to the success of your organization.

## Dynamic Personnel

We have a large pool of skilled, highly-trained individuals available for permanent placement, and for short- or long-term on-site assignment on a project basis. Each of these individuals has been interviewed and/or tested by one or more of our placement professionals to make sure they have the technical expertise, work experience, and perhaps most importantly, the positive attitude you look for when filling any position.

Many of our candidates have also received additional training in our offices, so that they are well versed in the latest versions of the most popular software applications.

It's one more reason why so many companies like yours call us first when they need skilled employees to fill important temporary and permanent positions.

- Permanent & Temporary
- Management
- Office & Administrative
- Accounting
- Detailers/Designers
- Engineers
- Computer Programmers
- Systems Analysts

**The Dynamic Group consists of:**

- **Dynamic Corporation**
- **Dynamic Design, Inc.**
- **Dynamic Information Systems, Inc.**
- **Dynamic Personnel, Inc.**
